Shop with ease

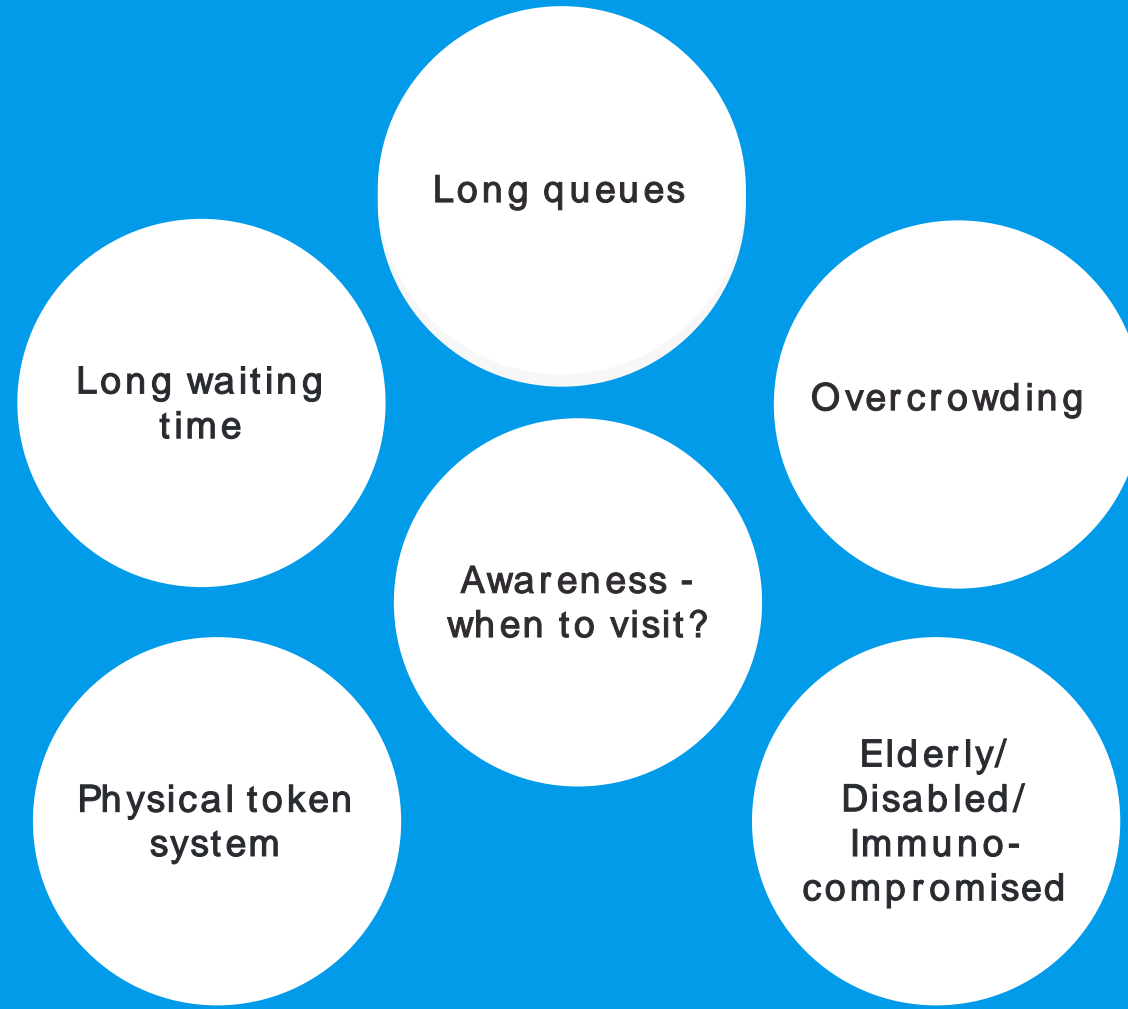

# PROBLEM

---

My mom goes to buy her grocery at 12PM and at the entrance of the store she is handed a token requesting her to visit the store at 6PM. Because the store lets in only 5 customers to avoid crowding and maintain social distancing.

# CURRENT SCENARIO

# CURRENT SCENARIO

How often did you go shopping prior to COVID-19?

How often do you go shopping during COVID-19?

# CURRENT SCENARIO

Do you think stores are taking appropriate measures to promote a safe environment?

Have you stood in queues outside your local supermarkets during this pandemic?

# CURRENT SCENARIO

- Yes
- No
- Maybe

Would you like to know how crowded is your local store before you visit?

Would you like be notified when the local store is less crowded?

Would you like to book your own time slot at your local store when it's less crowded?

**WHY DISJOIN?**

**1** Pooling real-time foot traffic using counters

**2** Estimating traffic for the upcoming time slots

**3** Option to book  
Provision for E ticketing

**4** Community Volunteering  
Elderly, Needy, Disabled &  
Immunocompromised

**5** Subscribe option  
SMS & Email alerts

**6** Curbside pickup

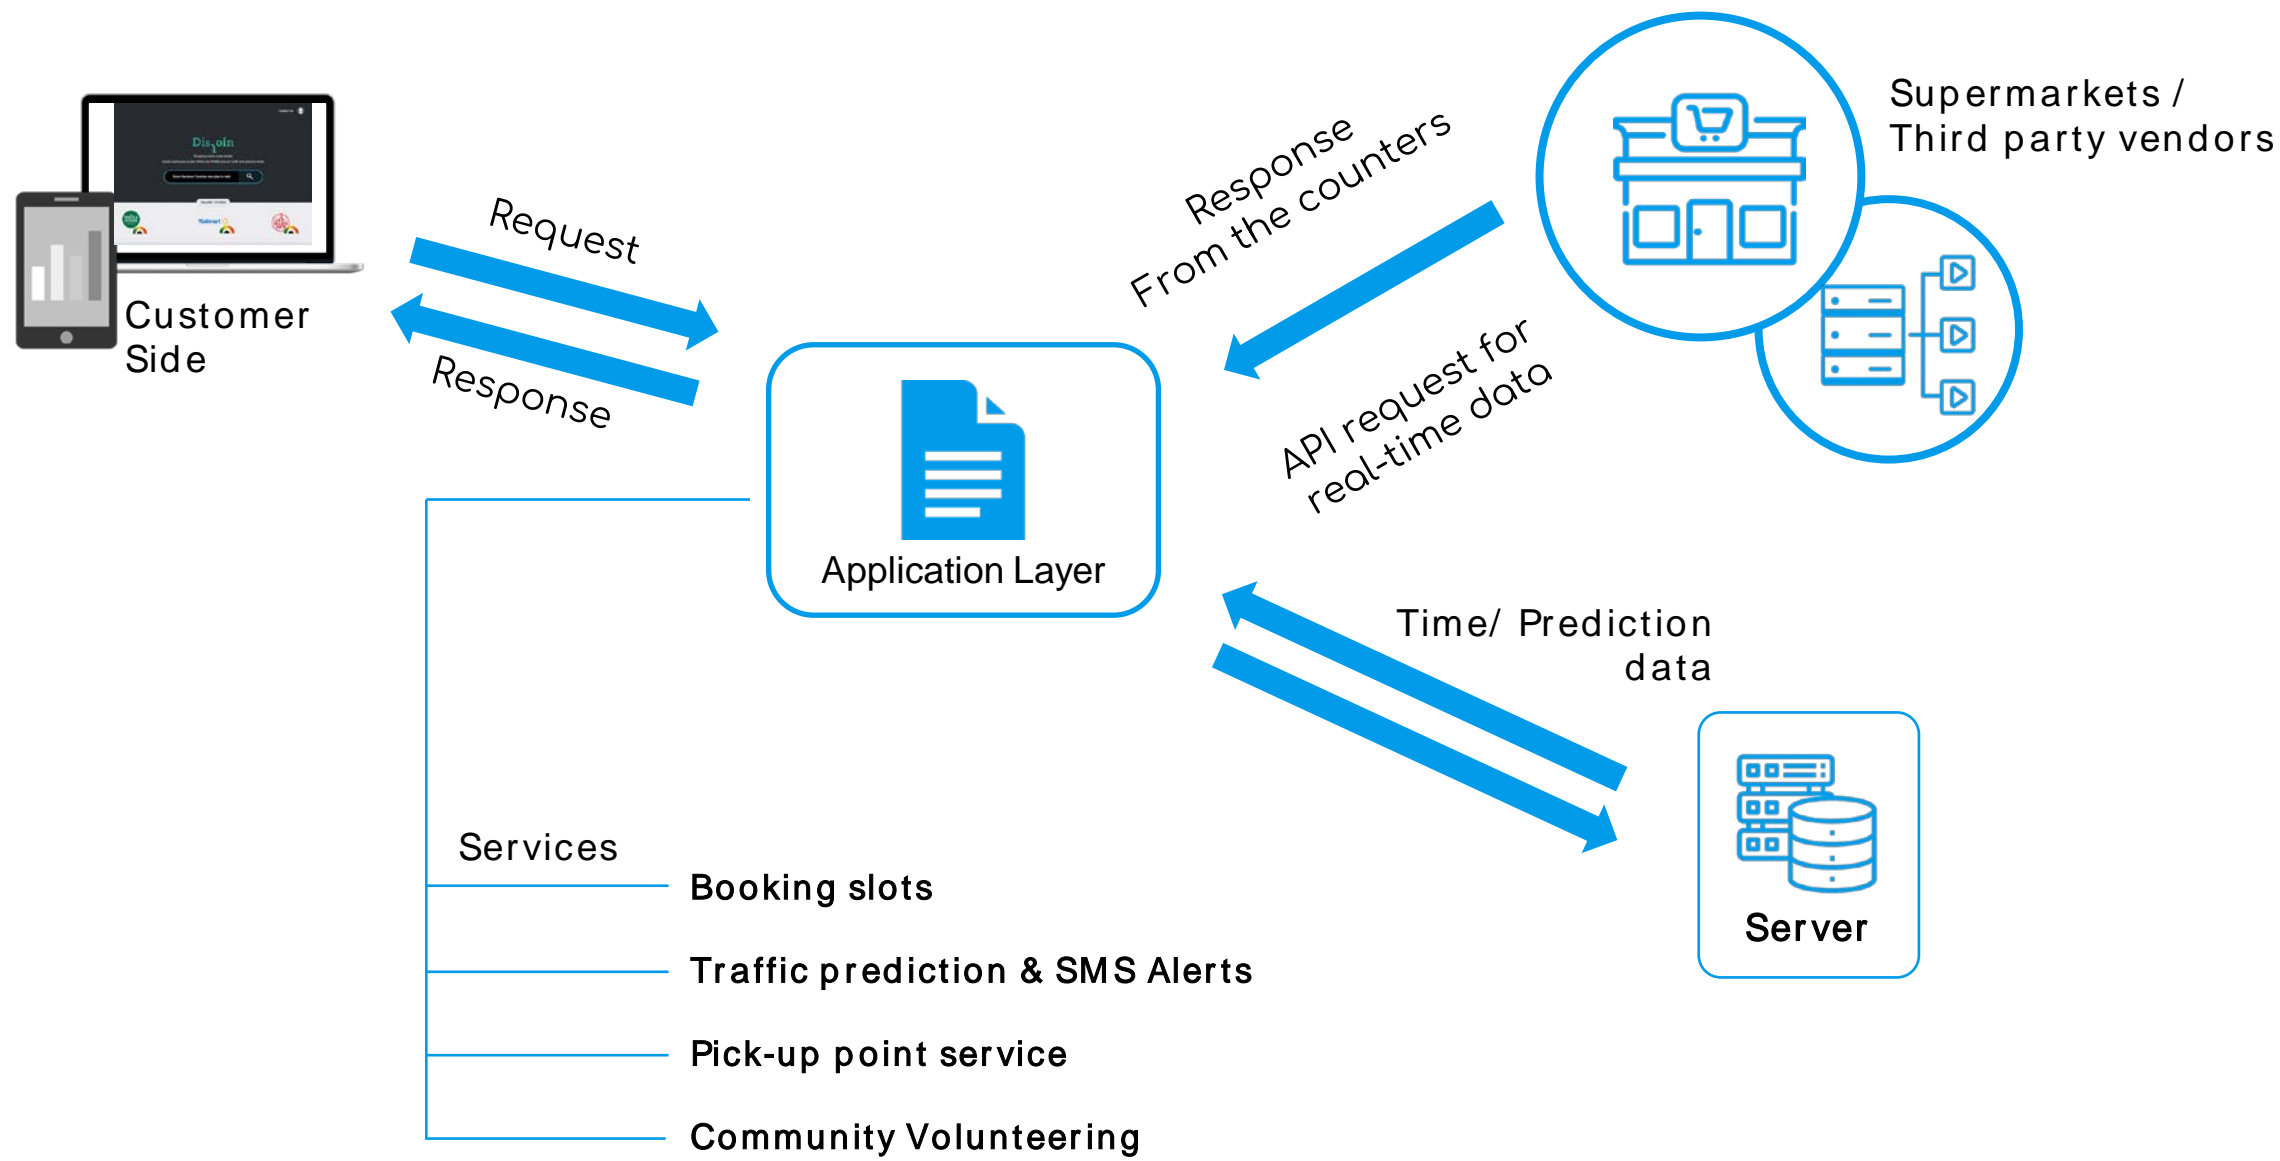

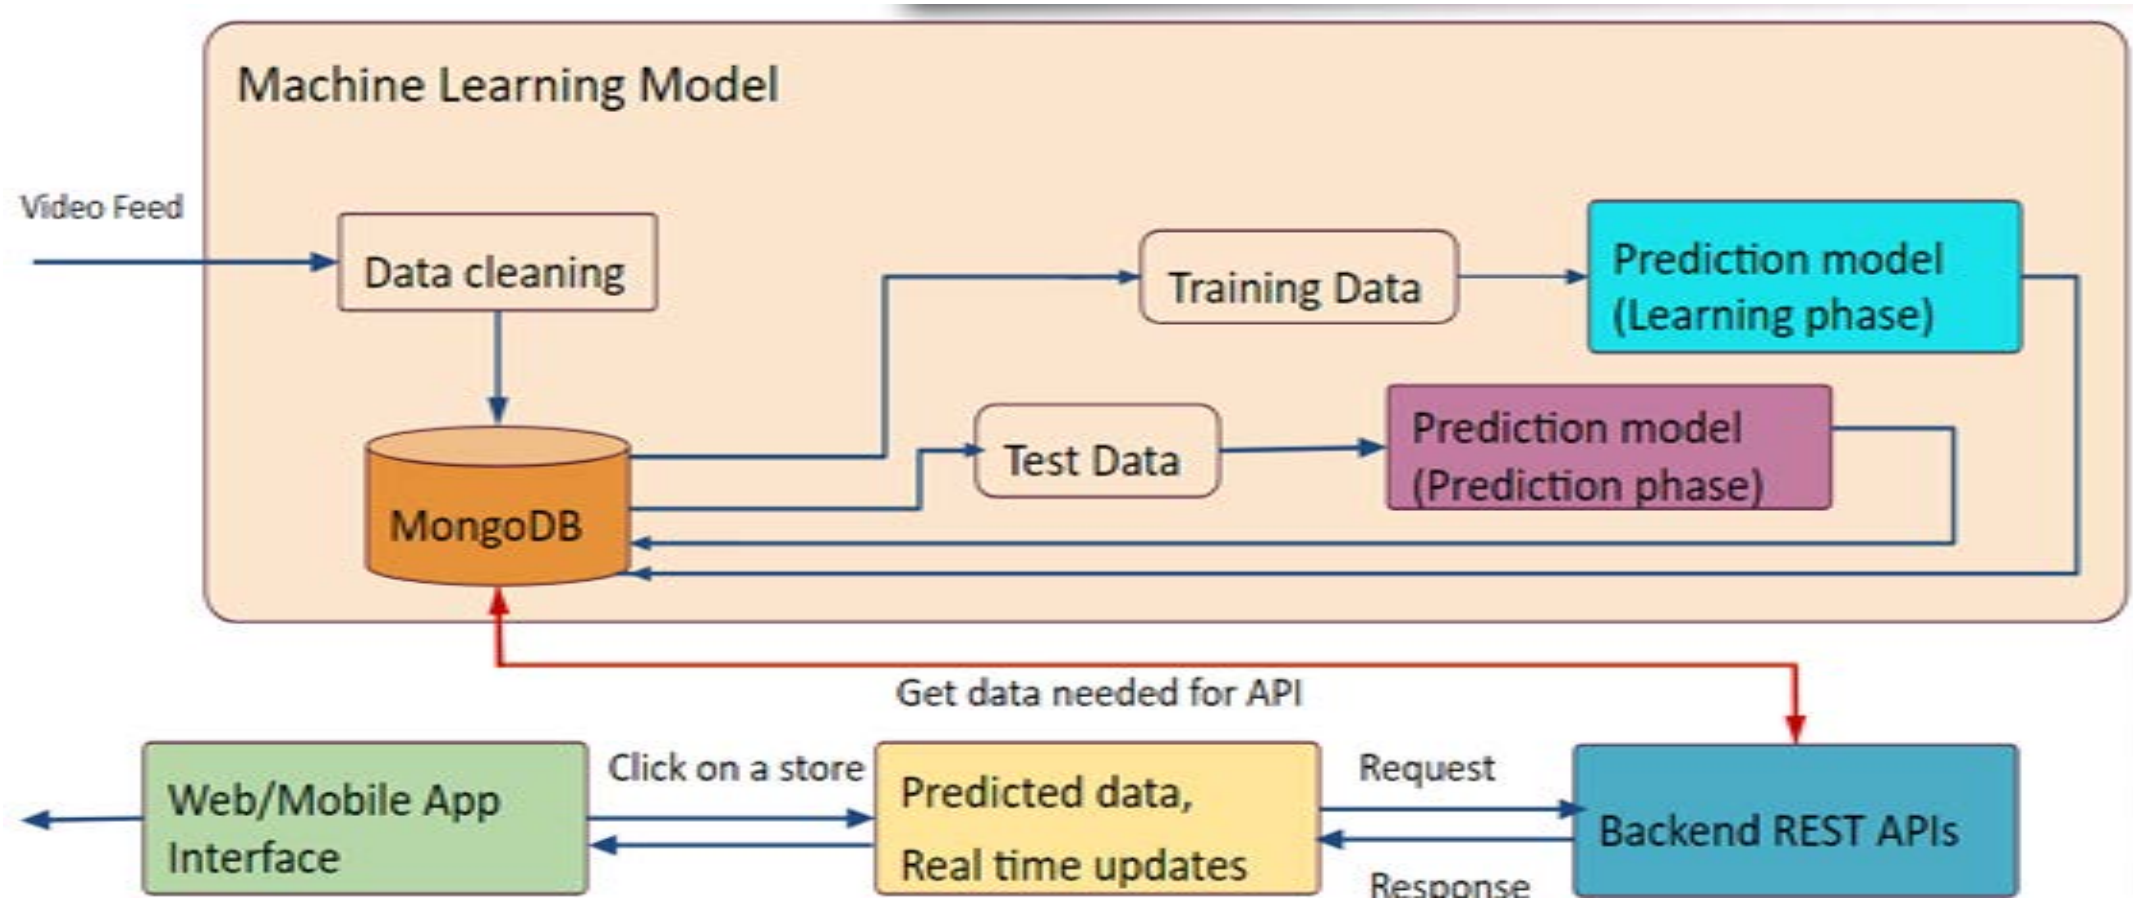

# MARKET COMPARISON

DESCRIPTION	CURRENT SCENARIO	DISJOIN
Pickup	✓ Prolong waiting period	✓
Delivery	✓ Prolong delivery option	
Social distancing		✓
Book Visit		✓
Real-time data	✓	✓
Prediction data	✓	✓
Reduce wait time		✓
Community volunteering	✓	✓
Alerts		✓

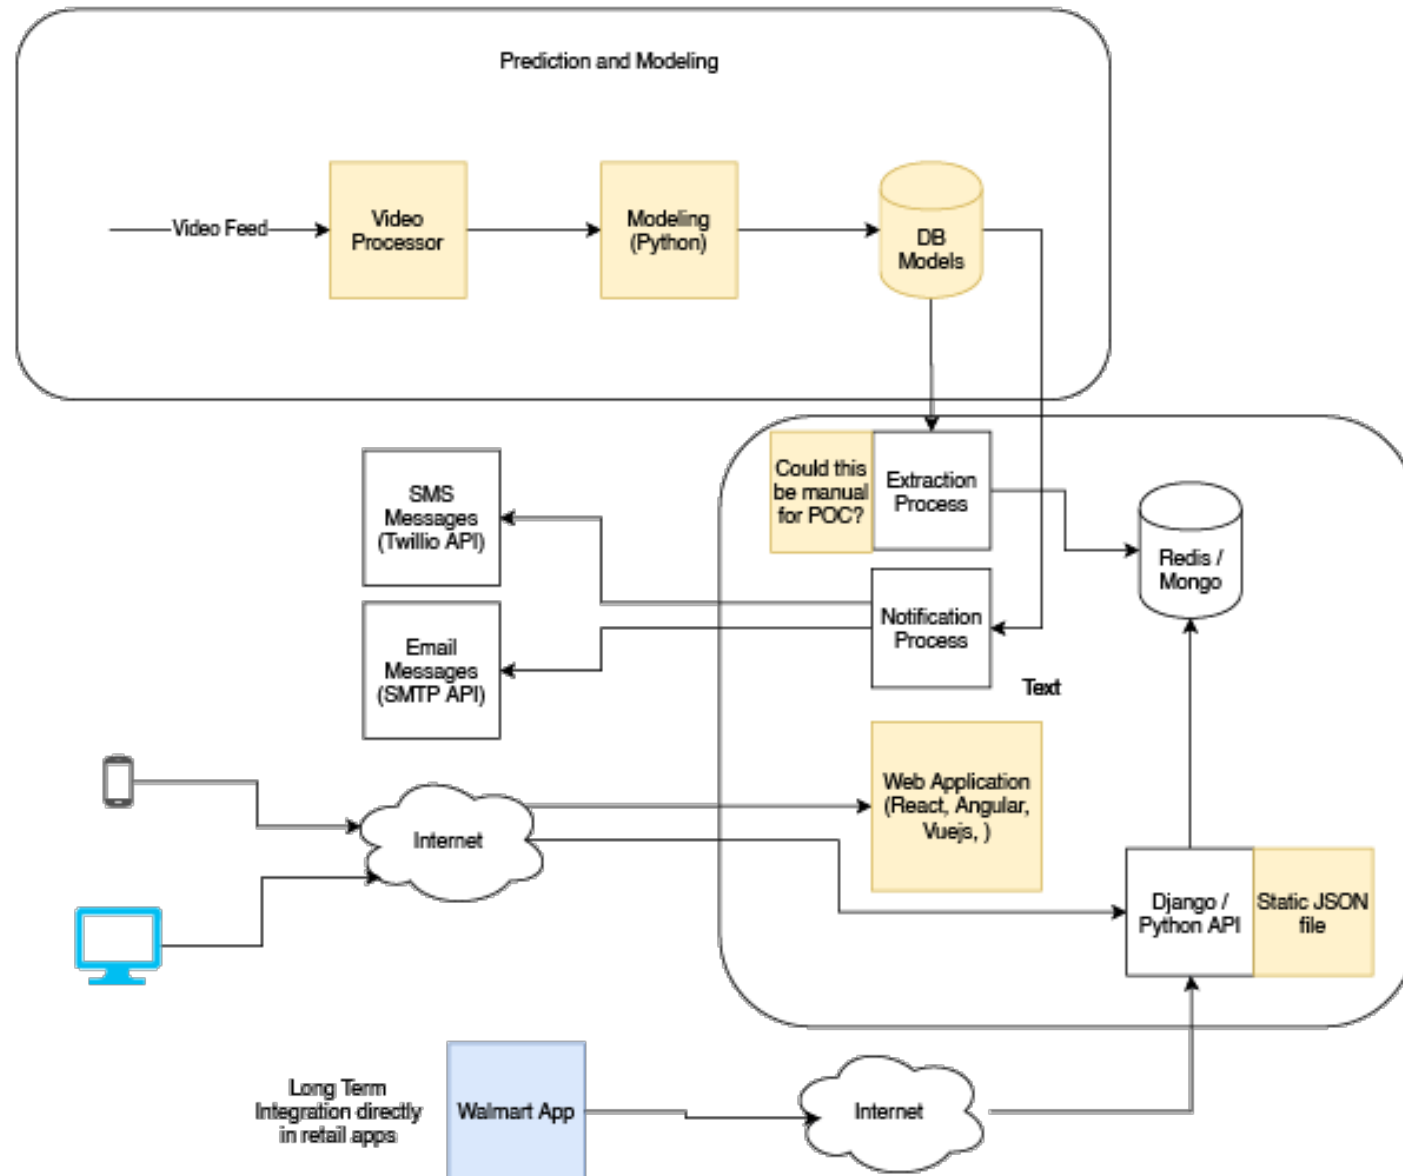

# IMPLEMENTATION

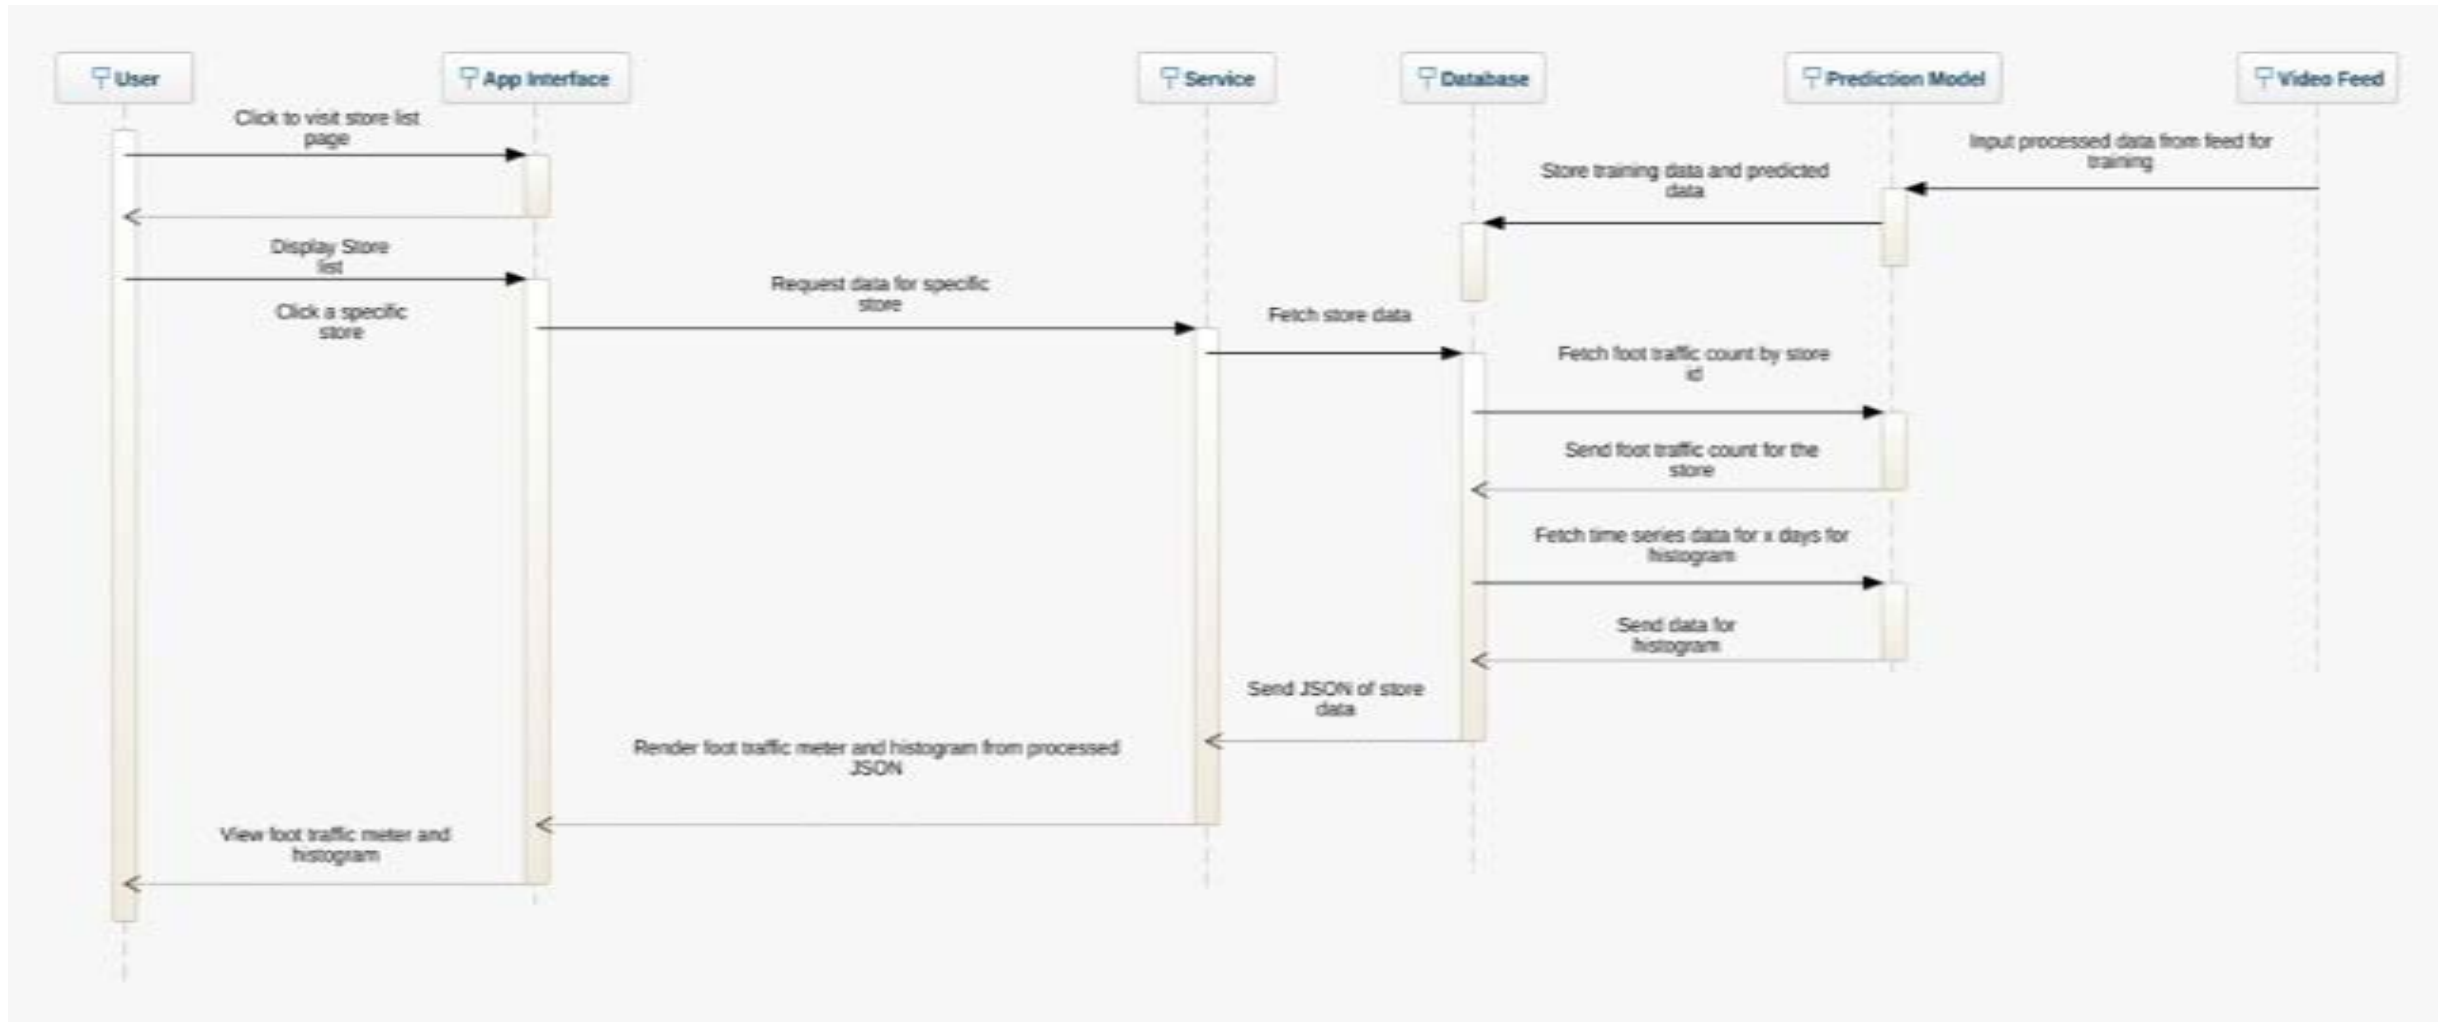

# HIGH LEVEL DESIGN ARCHITECTURE

# DESIGN ARCHITECTURE

# UML SEQUENCE DIAGRAM

# HACKATHON TIMELINE

Task	Timeline
Create React App Basic UI	17th June
Prediction API	16th June
Video Feed Processor	20th June
Store list API	19th June
Store data counter for foot traffic meter API	19th June
Time series data for histogram API	20th June
Front end Histogram and Traffic meter (with static JSON)	20th June
Integration with APIs and rendering data on Front end	21st June

# WHAT WE ACCOMPLISHED ?

- Build a development team
- Establish our product design architecture
- Finalised on the frontend and backend technologies for development
- Developed the MVP app
- Deployed the MVP on heroku for public viewing
- Streamline our prediction model

# WHAT NEXT ?

- Establish channels for getting real time data for the production model
- Looking forward to be accepted by Helpful
- Develop the app to a full product
